Bachelor of Technology in Geology
Federal University of Technology, Minna
2015 - 2020

SSCE, Science
Federal Government College Ugwolawo
2012 - 2015

JSCE
Teacher's Home International College
2009 - 2012

PROFILE

A frontend developer with over two years of experience, proficient in HTML, CSS, Tailwind CSS, JavaScript, ReactJS, NextJS, and MongoDB, with extensive knowledge of GIT and GitHub. A team player with strengths in adaptability and accuracy. He is driven by a deep passion for constructing responsive web applications, emphasizing high functionalities, beautiful user interfaces, and user-friendly navigation. In addition to his development work, he has also taught and mentored aspiring developers, helping them build a strong foundation in modern web technologies and real-world development practices.

WORK EXPERIENCE

Frontend developer

La Plage Meta Verse

<https://laplagemetaverse.org/>

- Worked on a Learning Management System (LMS) with role-based access for admin and students.
- Implemented student features for course enrollment, secure payments, learning access, and certificate generation after course completion
- Built admin interfaces for course management, student management, and content control.
- Integrated CBT (computer-based test) functionality for assessments and student evaluations after every course to get a certificate.
- Integrated a wallet system to handle user balances, payments, and transaction tracking.
- Supported additional features such as commission earning and earnings overview for eligible users.

Frontend developer

Walk-in-tech

<https://www.codewithunclebigbay.com>

- Developed the Learning Management System (LMS) website where students can take courses, watch video lessons, and complete assignments tied to each lesson.
- Implemented student features for video playback, assignment submission, and points tracking for course progress and engagement.
- Built admin interfaces for course management, including adding/editing content, uploading lessons, and monitoring student progress.
- Structured and styled responsive UI components to ensure clarity, usability, and smooth navigation on both desktop and mobile.

WORK EXPERIENCE

Software Engineer
Walk-in-tech

<https://www.shamzbridgeconsult.org/>

- Contributed as both a frontend and backend developer to create full-stack solutions.
- Spearheaded the ideation and development of a web application with a cross-functional team.
- Designed and implemented user-friendly interfaces, ensuring seamless user experiences.
- Developed robust endpoints utilizing TypeScript, integrating MongoDB as the primary database.

Frontend developer

<https://www.kuunapp.com>

- Developed the official showcase/landing website for KuunApp, a fintech product focused on funds management and bill payments.
- Designed and implemented responsive pages to clearly explain the app's core features, including wallet management, bill payments, fund transfers, and financial control tools.
- Structured content and user flows to guide visitors through how the app works, its benefits, and use cases.
- Collaborated with stakeholders to translate product ideas into clear, engaging web content and visuals.
- Optimized the website for performance, responsiveness, and accessibility across all devices.

Frontend developer

DOHAN Creationz

<https://jciaso.com/>

- Collaborated with a team to ideate and develop a web application.
 - Focused on bug fixes and enhanced overall system performance.
 - Worked closely with the project manager to coordinate and manage team tasks.
 - Tackled technical challenges and optimized the system to achieve peak performance.
-

WORK EXPERIENCE

Frontend developer

Walk-in-tech

<https://www.necaictacademy.org/>

- Developed a responsive digital skills training platform for NECA ICT Academy, designed to equip learners with in-demand ICT skills including software development and digital marketing.
- Implemented key learning features including application progress tracking, cohort-based management, and a content management system for structured course delivery.
- Developed a gallery feature to showcase academy activities, training sessions, and events.
- Built a modern, intuitive user interface focused on usability, clarity, and engagement across devices.
- Collaborated with stakeholders to translate industry training goals into effective frontend workflows and UI components.
- Ensured responsive design, performance optimization, and clear navigation to support learners and administrators alike.

Frontend developer

Walk-in-tech

<https://gaiacademy.org/>

- Led the development team through the full project lifecycle—from planning and content structuring to deployment—ensuring alignment with GAI Academy's educational goals and deadlines.
- Customized and configured the WordPress theme and plugins to deliver a seamless user experience and responsive design.
- Collaborated with stakeholders to structure site content and features, focusing on accessibility and ease of navigation for students and educators.
- Employed Agile principles to manage tasks, track progress, and incorporate feedback iteratively throughout the development process.

WORK EXPERIENCE

Frontend developer

Walk-in-tech

<https://www.studio3launchpad.com/>

- Oversaw the end-to-end development of Studio3 Launchpad, an LMS platform built with Next.js, ensuring alignment with educational objectives and timely delivery.
- Utilized Next.js to create a responsive, server-rendered frontend, enhancing performance and user experience across devices.
- Implemented personalized learning pathways, allowing users to engage with content suited to their career goals and skill levels.
- Worked closely with educators and industry experts to design course structures and features that meet the needs of learners
- Worked closely with a UI/UX designer to translate wireframes and design mockups into functional, user-friendly interfaces that support intuitive learning experiences.

Frontend developer

<https://www.aviritech.com/>

- Designed and developed the corporate website for Aviritech, a technology services company offering software development, secure payment services, and IT solutions that drive digital transformation for businesses.
 - Built responsive, modern web pages to showcase the company's services, mission, vision, and value propositions clearly and professionally.
 - Translated business goals and brand messaging into engaging frontend layouts, interactive content sections, and intuitive navigation.
 - Implemented performance optimizations, cross-browser compatibility, and accessibility best practices to ensure a smooth user experience on all devices.
 - Collaborated with stakeholders to refine content strategy and align visual design with the company's vision and values.

WORK EXPERIENCE

Frontend developer

<https://www.greencityafrica.org/>

- Designed and developed responsive user interfaces aligned with the organization's sustainability and community-focused mission
- Implemented clean layouts and intuitive navigation to improve user engagement and content accessibility.
- Collaborated with stakeholders to structure and present information clearly for diverse audiences.
- Applied performance optimization techniques to ensure fast loading times and smooth interactions.
- Ensured the website met modern web standards, including responsiveness, accessibility, and usability best practices.

Aquakuun

<https://aquakuun.com/>

- Designed and built the responsive marketing website for Aquakuun, a premium bottled water brand focused on pure quality, safety, and reliable delivery.
- Developed pages to clearly showcase the company's product offerings, quality assurance process, and delivery service features.
- Structured and styled content to highlight customer benefits, core service advantages, and brand values, improving clarity and engagement for site visitors.
- Collaborated with stakeholders to refine copy and visuals that align with the brand's commitment to excellence and customer trust
- Ensured intuitive navigation and layout for key sections including product information, quality process, testimonials, and contact details

I-grill

<https://i-grill.vercel.app/>

- Designed and developed a responsive e-commerce web application that allows users to browse products and manage purchases seamlessly.
- Implemented add-to-cart functionality with real-time cart updates, enabling users to view item quantities and totals instantly.
- Built features for editing and deleting cart items, ensuring a smooth and intuitive shopping experience.
- Integrated Flutterwave Inline payment (test API) to support secure checkout and payment flow simulation.
- Applied modern frontend best practices for state management, component reusability, and performance optimization.
